Subject: Re: Alon Refinery Class I UIC application and Aquifer Exemption Request

Thanks for the input. We will make the address corrections.

I also wanted to mention that all of your written communications have been addressed to the Air Division at Region 9, and consequently have been mis-delivered when it comes to the correspondence related to your UIC permit application. If you would kindly address your UIC correspondence to my supervisor, David Albright, Chief, Drinking Water Protection Section. that would be very helpful. Air-related items can still be sent to the attention of the Air Division, but your Waste Discharge Order Annual Monitoring Report (which I have just received) and anything associated with your injection activities should go to Mr. Albright. Thank you!

Once you've had a chance to plot all the existing wells and the proposed wells and the exact formations that were granted exemptions for Class II disposal perhaps we can discuss the best approach for Alon's Class I request. I do not have Helen Ordway's email address, would you kindly forward this information to her as well. I would appreciate it.
